● Business Fields and Organization

The Chugai Ro group consists of seven subsidiaries in addition to the principal company. These companies mainly deal in the design, manufacture, installation, and sale of production equipment, environmental equipment and combustion equipment intended for use primarily in the fields of steel making, automobiles, nonferrous metals, semiconductors, batteries, air purification, waste treatment and recycling. The Chugai Ro group also expands its business activities to engineering, research and development, and service activities relating to the various business operations.
